Nutritional Counseling - 7th Edition

Lesson 9 Test Questions

1. The decline in estrogen production in women after menopause leads to all of the following EXCEPT:
a. more acne.
b. accelerated loss of bone mass.
c. an increase in abdominal fat.
d. greater risk of cardiovascular disease.
e. All of the above occur with less estrogen.

2. To lose one pound per week, a person would need to eat _____ fewer Calories per day.
a. 250
b. 300
c. 450
d. 500
e. 1,000

3. Metabolic rate and energy expenditure begin to decline in early adulthood at a rate of about _____ per decade for women and _____ per decade for men.
a. 2.0%, 2.9%
b. 5.0%, 5.9%
c. 8.0%, 8.0%
d. 5.9%, 5.0%
e. 2.9%, 2.0%

4. The Acceptable Macronutrient Distribution Range for total fat intake is _____ of Calories.
a. 10-15%
b. 15-20%
c. 20-35%
d. 35-40%
e. 40-50%

5.Based on the Acceptable Macronutrient Distribution Ranges, someone that consumes 2000 Calories per day should aim for _____ fat Calories/day.
a. 200-400
b. 400-700
c. 600-900
d. 1000-1200

6. An alcoholic drink contains roughly _____ grams of alcohol or 0.5 oz of ethanol.
a. 2-5
b. 6-8
c. 9-11
d. 13-15
e. 17-21

7. One serving of Gardetto's reduced-fat chips and twists snack mix contains 220 Calories, with 79 kcal from fat. Therefore, the snack mix derives _____% kcal from fat:
a. 75
b. 50
c. 36
d. 25
e. 5

8. Using the answer from question #7, would this product fit the Acceptable Macronutrient Distribution Range for fat intake?
a. Yes
b. No
c. Not enough information to determine

9. Use the food label below to answer questions 9-11.

Nutrition Facts	
Serving Size 1 cup (228g)	
Servings Per Container 2	
Amount Per Serving	
Calories 260	Calories from Fat 120
	% Daily Value*
Total Fat 13g	20%
Saturated Fat 5g	25%
Trans Fat 2g	
Cholesterol 30mg	10%
Sodium 660mg	28%
Total Carbohydrate 31g	10%
Dietary Fiber 0g	
Sugars 5g	
Protein 5g	
Vitamin A 4% •	Vitamin C 2%
Calcium 15% •	Iron 4%

What % of Calories in this food are provided by saturated fat?
a. 2%
b. 9%
c. 13%
d. 17%
e. 25%

10. Would a person who consumed one container of the food described in this label plus an additional 15 g saturated fat in the same day meet the current recommendations for saturated fat intake (based on the Daily Value)?
a. Yes, they would meet the recommendations.
b. No, they would not meet the recommended amount.
c. Based on the recommendations, they would consume too much saturated fat.

11. Would the food described in this label be a good source of fiber?
a. Yes
b. No

Use the following information to answer questions 12-13.

Michelle is a 49-year-old, lightly active female who weighs 131 pounds and is 5'8" tall.
Females: REE = (10 x weight) + (6.25 x height) - (5 x age) - 161
Sedentary = 1.2
Light activity = 1.4
Moderate activity = 1.6
Very active = 1.1

12. What is Michelle's resting metabolic rate?
a. 1270
b. 1500
c. 1760
d. 2164
e. 2340

13. What is Michelle's estimated daily Calorie expenditure?
a. 1500
b. 1780
c. 1930
d. 2100
e. 2450

14. The majority of cancers develop in:
a. epithelial tissue.
b. lymph nodes.
c. adipocytes.
d. bones and bone marrow.
e. connective tissue

15. The areas of the body affected by cardiovascular diseases include the:
a. heart.
b. brain.
c. blood vessels.
d. All of the above
e. a and c only

16. Which of the following is NOT a risk factor for coronary heart disease?
a. HDL cholesterol < 40 mg/dL
b. Age 55 and older in women
c. Excess hip or thigh fat
d. Consumption of few whole-grain products
e. Diabetes

17. Metabolic syndrome is related to a cluster of metabolic abnormalities that include:
a. low fasting blood glucose levels.
b. abdominal obesity.
c. low LDL levels.
d. high levels of HDL cholesterol.
e. All of the above

Use the following information for questions 18-20.

Mr. Jones
Sex: Male
Hours of work: 55+/wk
Age: 61
Occupation: Computer programmer
Household members: wife, 65 years old
Family Hx: coronary artery disease in father, had MI age 59
Smoker: yes, 40 years, 1 pack/day
Ht = 70" Wt = 190 lbs
BMI = 27
Waist circumference: 43 inches
Cholesterol: 220 mg/dL; HDL-C 30 mg/dL; LDL-C 160 mg/dL; VLDL 45 mg/dL; TG 150 mg/dL
Blood pressure: 140/85

Diet history of Mr. Jones shows that he eats the following foods: Dairy products such as milk, cheese, and ice cream regularly. He consumes a variety of protein-rich foods including fish, shellfish, beef, poultry, and eggs; and large quantities of rice and potatoes; and he and his wife also frequently eat breads, crackers, and potato chips. Mr. Jones consumes a large variety of vegetables including eggplant, broccoli, mushrooms, onions, and tomatoes, although many of these are deep fried or cooked in butter.

18. According to the BMI chart on page 519 Mr. Jones is:
a. underweight
b. normal weight
c. overweight
d. severely obese

19. Based on the information above, what chronic disease is he at risk of developing?
a. Coronary heart disease
b. Colon cancer
c. Type 2 diabetes
d. All of the above
e. a and c

20. What dietary suggestions could you make to him to help decrease his risk factors?
a. Decrease consumption of high-fat dairy products
b. Increase whole grain intake
c. Increase dietary fiber intake
d. Choose lean cuts of meat and poultry
e. All of the above
